CR-03 Requirements Specifications and Acceptance Criteria: JOB-001 to JOB-010

Document ID: CR-03 | Category A: Client requirements

1. Document metadata

Field	Value
Document ID	CR-03
Filename	CR-03_Requirements_Specs_and_Acceptance_Criteria.pdf
Category	A - Client requirements
Version	1.0
Creation date	2026-10-14
Data status	Synthetic (fictional client and job); snapshot of the job record - the relational database is authoritative for live values
Main topics	Requirements specification; Acceptance criteria
Relevant skills and technologies	Angular; Spring Boot; PostgreSQL; Docker; Unit testing; TypeScript; RxJS; NgRx; Accessibility; Python; RAG pipeline; Vector search; FastAPI; LLM evaluation; Kubernetes; CI/CD; Terraform; Monitoring; AWS; Flutter; Dart; Offline storage; Firebase push; scikit-learn; PyTorch; REST API design; Redis; Security scanning
Relevant entity IDs	JOB-001-SPEC, JOB-002-SPEC, JOB-003-SPEC, JOB-004-SPEC, JOB-005-SPEC, JOB-006-SPEC, JOB-007-SPEC, JOB-008-SPEC, JOB-009-SPEC, JOB-010-SPEC, JOB-001, JOB-002, JOB-003, JOB-004, JOB-005, JOB-006, JOB-007, JOB-008, JOB-009, JOB-010

Purpose and scope: this PDF consolidates 10 source documents (JOB-001-SPEC to JOB-010-SPEC). Each source keeps its own ID in every section heading, so chunks stay attributable, for example [DOC:JOB-001-SPEC/...].

2. Executive summary

JOB-001 has 4 functional requirements, 2 non-functional requirements and 4 acceptance criteria, linked by IDs of the form REQ-001-NN and AC-001-NN. JOB-002 has 4 functional requirements, 2 non-functional requirements and 4 acceptance criteria, linked by IDs of the form REQ-002-NN and AC-002-NN. This PDF contains 10 source documents in total.

3. JOB-001-SPEC: JOB-001 Requirements Specification and Acceptance Criteria

Source document ID: JOB-001-SPEC | Data status: Synthetic (fictional client and job); snapshot of the job record - the relational database is authoritative for live values

Purpose and scope: the detailed requirements and acceptance criteria of JOB-001 (B2B ordering portal (Angular + Spring Boot)).

JOB-001-SPEC executive summary

JOB-001 has 4 functional requirements, 2 non-functional requirements and 4 acceptance criteria, linked by IDs of the form REQ-001-NN and AC-001-NN.

JOB-001-SPEC - Functional requirements of JOB-001

Requirement ID	Requirement (JOB-001)	Priority
REQ-001-01	Customers log in with email and password and see only their company's orders.	Must
REQ-001-02	Catalog supports search and filtering by category, brand and availability.	Must
REQ-001-03	A customer can place an order from a saved cart and receives an email confirmation.	Must
REQ-001-04	Staff can export new orders as CSV.	Should

JOB-001-SPEC - Non-functional requirements of JOB-001

Requirement ID	Requirement (JOB-001)	Priority
NFR-001-01	Order list loads within 1 second for 20,000 orders (illustrative target).	Must
NFR-001-02	Authentication uses JWT and role checks.	Should

Targets marked illustrative are examples and may be changed by the client.

JOB-001-SPEC - Acceptance criteria of JOB-001

Acceptance criteria of JOB-001 define when the client accepts delivery. Each criterion is observable and linked to a requirement of JOB-001.

Criterion ID	Linked requirement	Acceptance criterion (JOB-001)	Verification
AC-001-01	REQ-001-01	A customer from Company A cannot read Company B orders (tested).	Test, demo or document review
AC-001-02	REQ-001-02	Catalog filter returns correct results for 10 agreed test queries.	Test, demo or document review
AC-001-03	REQ-001-03	Order confirmation email is sent within 2 minutes in staging.	Test, demo or document review
AC-001-04	REQ-001-04	Automated tests run in the delivery pipeline and pass.	Test, demo or document review

JOB-001-SPEC - Assumptions and dependencies of JOB-001

- Client provides product data export (CSV) in week 1.
- Client provides an SMTP account.

JOB-001-SPEC - Change control for JOB-001

Changes to the requirements of JOB-001 follow the process in EST-006: written request, impact estimate on cost and schedule, client approval and updated baseline. A requirement marked Must cannot be removed without client approval.

JOB-001-SPEC - Summary of key findings

- JOB-001 acceptance criteria: 4 observable tests.
- JOB-001 requirements marked Must: 3.

JOB-001-SPEC - Keywords and alternative terminology

JOB-001 requirements; JOB-001 acceptance criteria; requirements specification; SRS; functional requirements; non-functional requirements; acceptance test; Angular; Spring Boot; PostgreSQL

4. JOB-002-SPEC: JOB-002 Requirements Specification and Acceptance Criteria

Source document ID: JOB-002-SPEC | Data status: Synthetic (fictional client and job); snapshot of the job record - the relational database is authoritative for live values

Purpose and scope: the detailed requirements and acceptance criteria of JOB-002 (Analytics dashboard front end).

JOB-002-SPEC executive summary

JOB-002 has 4 functional requirements, 2 non-functional requirements and 4 acceptance criteria, linked by IDs of the form REQ-002-NN and AC-002-NN.

JOB-002-SPEC - Functional requirements of JOB-002

Requirement ID	Requirement (JOB-002)	Priority
REQ-002-01	Dashboard loads metrics from the existing REST API and refreshes every 60 seconds.	Must
REQ-002-02	Users can filter by date range and team.	Must
REQ-002-03	Each widget shows loading, empty and error states.	Must
REQ-002-04	All controls are reachable by keyboard.	Should

JOB-002-SPEC - Non-functional requirements of JOB-002

Requirement ID	Requirement (JOB-002)	Priority
NFR-002-01	Initial load under 3 seconds on a standard laptop (illustrative target).	Must
NFR-002-02	Strict TypeScript and linting enabled.	Should

Targets marked illustrative are examples and may be changed by the client.

JOB-002-SPEC - Acceptance criteria of JOB-002

Acceptance criteria of JOB-002 define when the client accepts delivery. Each criterion is observable and linked to a requirement of JOB-002.

Criterion ID	Linked requirement	Acceptance criterion (JOB-002)	Verification
AC-002-01	REQ-002-01	All 6 widgets render with the agreed sample data.	Test, demo or document review
AC-002-02	REQ-002-02	Filter changes update all widgets without a page reload.	Test, demo or document review
AC-002-03	REQ-002-03	Keyboard-only walkthrough of all controls succeeds.	Test, demo or document review
AC-002-04	REQ-002-04	Unit tests exist for filter logic and data services.	Test, demo or document review

JOB-002-SPEC - Assumptions and dependencies of JOB-002

- Client provides API documentation and a test key in week 1.
- Conference date is a hard deadline.

JOB-002-SPEC - Change control for JOB-002

Changes to the requirements of JOB-002 follow the process in EST-006: written request, impact estimate on cost and schedule, client approval and updated baseline. A requirement marked Must cannot be removed without client approval.

JOB-002-SPEC - Summary of key findings

- JOB-002 acceptance criteria: 4 observable tests.
- JOB-002 requirements marked Must: 3.

JOB-002-SPEC - Keywords and alternative terminology

JOB-002 requirements; JOB-002 acceptance criteria; requirements specification; SRS; functional requirements; non-functional requirements; acceptance test; Angular; TypeScript; RxJS

5. JOB-003-SPEC: JOB-003 Requirements Specification and Acceptance Criteria

Source document ID: JOB-003-SPEC | Data status: Synthetic (fictional client and job); snapshot of the job record - the relational database is authoritative for live values

Purpose and scope: the detailed requirements and acceptance criteria of JOB-003 (RAG assistant for company documents).

JOB-003-SPEC executive summary

JOB-003 has 4 functional requirements, 2 non-functional requirements and 4 acceptance criteria, linked by IDs of the form REQ-003-NN and AC-003-NN.

JOB-003-SPEC - Functional requirements of JOB-003

Requirement ID	Requirement (JOB-003)	Priority
REQ-003-01	Documents are ingested with metadata (department, version, date).	Must
REQ-003-02	The API returns an answer and citations for every response, or states that no source was found.	Must
REQ-003-03	Retrieval supports filtering by department and document version.	Must
REQ-003-04	An evaluation set of at least 50 questions with expected sources is delivered.	Should

JOB-003-SPEC - Non-functional requirements of JOB-003

Requirement ID	Requirement (JOB-003)	Priority
NFR-003-01	Answer latency under 5 seconds (illustrative target).	Must
NFR-003-02	No personal data is sent to external services without approval.	Should

Targets marked illustrative are examples and may be changed by the client.

JOB-003-SPEC - Acceptance criteria of JOB-003

Acceptance criteria of JOB-003 define when the client accepts delivery. Each criterion is observable and linked to a requirement of JOB-003.

Criterion ID	Linked requirement	Acceptance criterion (JOB-003)	Verification
AC-003-01	REQ-003-01	Retrieval Recall@5 is reported on the evaluation set, with the method described.	Test, demo or document review
AC-003-02	REQ-003-02	Every answer in a 20-question acceptance test includes at least one citation.	Test, demo or document review
AC-003-03	REQ-003-03	Answers for unanswerable questions state that no source was found.	Test, demo or document review
AC-003-04	REQ-003-04	Setup is documented and runs from a container image.	Test, demo or document review

JOB-003-SPEC - Assumptions and dependencies of JOB-003

- Client provides documents and subject-matter experts for evaluation questions.
- Client approves the language model provider.

JOB-003-SPEC - Change control for JOB-003

Changes to the requirements of JOB-003 follow the process in EST-006: written request, impact estimate on cost and schedule, client approval and updated baseline. A requirement marked Must cannot be removed without client approval.

JOB-003-SPEC - Summary of key findings

- JOB-003 acceptance criteria: 4 observable tests.
- JOB-003 requirements marked Must: 3.

JOB-003-SPEC - Keywords and alternative terminology

JOB-003 requirements; JOB-003 acceptance criteria; requirements specification; SRS; functional requirements; non-functional requirements; acceptance test; Python; RAG pipeline; Vector search; FastAPI

6. JOB-004-SPEC: JOB-004 Requirements Specification and Acceptance Criteria

Source document ID: JOB-004-SPEC | Data status: Synthetic (fictional client and job); snapshot of the job record - the relational database is authoritative for live values

Purpose and scope: the detailed requirements and acceptance criteria of JOB-004 (Kubernetes migration with CI/CD).

JOB-004-SPEC executive summary

JOB-004 has 4 functional requirements, 2 non-functional requirements and 4 acceptance criteria, linked by IDs of the form REQ-004-NN and AC-004-NN.

JOB-004-SPEC - Functional requirements of JOB-004

Requirement ID	Requirement (JOB-004)	Priority
REQ-004-01	Each service has a reproducible container image.	Must
REQ-004-02	A pipeline builds, tests and deploys to a staging cluster.	Must
REQ-004-03	Infrastructure is defined with Terraform.	Must
REQ-004-04	Production cut-over runbook with rollback steps is delivered.	Should

JOB-004-SPEC - Non-functional requirements of JOB-004

Requirement ID	Requirement (JOB-004)	Priority
NFR-004-01	Zero secrets stored in images.	Must
NFR-004-02	Alerts on error rate and latency.	Should

Targets marked illustrative are examples and may be changed by the client.

JOB-004-SPEC - Acceptance criteria of JOB-004

Acceptance criteria of JOB-004 define when the client accepts delivery. Each criterion is observable and linked to a requirement of JOB-004.

Criterion ID	Linked requirement	Acceptance criterion (JOB-004)	Verification
AC-004-01	REQ-004-01	All six services run on staging and pass the client smoke tests.	Test, demo or document review

Criterion ID	Linked requirement	Acceptance criterion (JOB-004)	Verification
AC-004-02	REQ-004-02	A deployment can be reproduced from a clean environment using the repository only.	Test, demo or document review
AC-004-03	REQ-004-03	Rollback is rehearsed once and documented.	Test, demo or document review
AC-004-04	REQ-004-04	Dashboards show request rate, errors and latency.	Test, demo or document review

JOB-004-SPEC - Assumptions and dependencies of JOB-004

- Client provides cloud account access in week 1.
- Contract end date is a hard deadline.

JOB-004-SPEC - Change control for JOB-004

Changes to the requirements of JOB-004 follow the process in EST-006: written request, impact estimate on cost and schedule, client approval and updated baseline. A requirement marked Must cannot be removed without client approval.

JOB-004-SPEC - Summary of key findings

- JOB-004 acceptance criteria: 4 observable tests.
- JOB-004 requirements marked Must: 3.

JOB-004-SPEC - Keywords and alternative terminology

JOB-004 requirements; JOB-004 acceptance criteria; requirements specification; SRS; functional requirements; non-functional requirements; acceptance test; Docker; Kubernetes; CI/CD; Terraform

7. JOB-005-SPEC: JOB-005 Requirements Specification and Acceptance Criteria

Source document ID: JOB-005-SPEC | Data status: Synthetic (fictional client and job); snapshot of the job record - the relational database is authoritative for live values

Purpose and scope: the detailed requirements and acceptance criteria of JOB-005 (Flutter fitness booking app).

JOB-005-SPEC executive summary

JOB-005 has 4 functional requirements, 2 non-functional requirements and 4 acceptance criteria, linked by IDs of the form REQ-005-NN and AC-005-NN.

JOB-005-SPEC - Functional requirements of JOB-005

Requirement ID	Requirement (JOB-005)	Priority
REQ-005-01	Members browse classes by day and location and book or cancel.	Must
REQ-005-02	Booked classes remain visible offline.	Must
REQ-005-03	Push notification reminders are sent one hour before a class.	Must
REQ-005-04	App consumes the existing REST API.	Should

JOB-005-SPEC - Non-functional requirements of JOB-005

Requirement ID	Requirement (JOB-005)	Priority
NFR-005-01	Cold start under 3 seconds on a mid-range phone (illustrative target).	Must
NFR-005-02	Tokens are stored securely.	Should

Targets marked illustrative are examples and may be changed by the client.

JOB-005-SPEC - Acceptance criteria of JOB-005

Acceptance criteria of JOB-005 define when the client accepts delivery. Each criterion is observable and linked to a requirement of JOB-005.

Criterion ID	Linked requirement	Acceptance criterion (JOB-005)	Verification
AC-005-01	REQ-005-01	Booking and cancellation succeed on Android and iOS test devices.	Test, demo or document review
AC-005-02	REQ-005-02	Airplane-mode test shows booked classes.	Test, demo or document review
AC-005-03	REQ-005-03	Reminder notification arrives within 2 minutes of the scheduled time in testing.	Test, demo or document review
AC-005-04	REQ-005-04	Widget and unit tests exist for the booking flow.	Test, demo or document review

JOB-005-SPEC - Assumptions and dependencies of JOB-005

- Client provides API documentation and developer store accounts.
- Store review time is outside the freelancer's control.

JOB-005-SPEC - Change control for JOB-005

Changes to the requirements of JOB-005 follow the process in EST-006: written request, impact estimate on cost and schedule, client approval and updated baseline. A requirement marked Must cannot be removed without client approval.

JOB-005-SPEC - Summary of key findings

- JOB-005 acceptance criteria: 4 observable tests.
- JOB-005 requirements marked Must: 3.

JOB-005-SPEC - Keywords and alternative terminology

JOB-005 requirements; JOB-005 acceptance criteria; requirements specification; SRS; functional requirements; non-functional requirements; acceptance test; Flutter; Dart

8. JOB-006-SPEC: JOB-006 Requirements Specification and Acceptance Criteria

Source document ID: JOB-006-SPEC | Data status: Synthetic (fictional client and job); snapshot of the job record - the relational database is authoritative for live values

Purpose and scope: the detailed requirements and acceptance criteria of JOB-006 (Retail recommendation engine).

JOB-006-SPEC executive summary

JOB-006 has 4 functional requirements, 2 non-functional requirements and 4 acceptance criteria, linked by IDs of the form REQ-006-NN and AC-006-NN.

JOB-006-SPEC - Functional requirements of JOB-006

Requirement ID	Requirement (JOB-006)	Priority
REQ-006-01	A training pipeline reads purchase events and produces item similarities.	Must
REQ-006-02	An evaluation report compares the recommender with a popularity baseline.	Must
REQ-006-03	An API returns top 10 suggestions for a product.	Must
REQ-006-04	Cold-start products fall back to category popularity.	Should

JOB-006-SPEC - Non-functional requirements of JOB-006

Requirement ID	Requirement (JOB-006)	Priority
NFR-006-01	API latency under 200 ms (illustrative target).	Must
NFR-006-02	Training is reproducible with fixed seeds.	Should

Targets marked illustrative are examples and may be changed by the client.

JOB-006-SPEC - Acceptance criteria of JOB-006

Acceptance criteria of JOB-006 define when the client accepts delivery. Each criterion is observable and linked to a requirement of JOB-006.

Criterion ID	Linked requirement	Acceptance criterion (JOB-006)	Verification
AC-006-01	REQ-006-01	Offline precision at 10 is reported against the baseline with a time-based split.	Test, demo or document review
AC-006-02	REQ-006-02	API returns suggestions for 5 sample products within the latency target.	Test, demo or document review
AC-006-03	REQ-006-03	Cold-start fallback is demonstrated.	Test, demo or document review
AC-006-04	REQ-006-04	Training steps are documented and reproducible.	Test, demo or document review

JOB-006-SPEC - Assumptions and dependencies of JOB-006

- Client provides event data export and a data dictionary.

JOB-006-SPEC - Change control for JOB-006

Changes to the requirements of JOB-006 follow the process in EST-006: written request, impact estimate on cost and schedule, client approval and updated baseline. A requirement marked Must cannot be removed without client approval.

JOB-006-SPEC - Summary of key findings

- JOB-006 acceptance criteria: 4 observable tests.
- JOB-006 requirements marked Must: 3.

JOB-006-SPEC - Keywords and alternative terminology

JOB-006 requirements; JOB-006 acceptance criteria; requirements specification; SRS; functional requirements; non-functional requirements; acceptance test; Python; scikit-learn; FastAPI

9. JOB-007-SPEC: JOB-007 Requirements Specification and Acceptance Criteria

Source document ID: JOB-007-SPEC | Data status: Synthetic (fictional client and job); snapshot of the job record - the relational database is authoritative for live values

Purpose and scope: the detailed requirements and acceptance criteria of JOB-007 (Marketplace platform MVP).

JOB-007-SPEC executive summary

JOB-007 has 4 functional requirements, 2 non-functional requirements and 4 acceptance criteria, linked by IDs of the form REQ-007-NN and AC-007-NN.

JOB-007-SPEC - Functional requirements of JOB-007

Requirement ID	Requirement (JOB-007)	Priority
REQ-007-01	Clients post jobs with budget, deadline and required skills.	Must
REQ-007-02	Artisans submit proposals with price and duration.	Must
REQ-007-03	Clients compare proposals in a table.	Must
REQ-007-04	Roles for client, artisan and administrator with separate permissions.	Should

JOB-007-SPEC - Non-functional requirements of JOB-007

Requirement ID	Requirement (JOB-007)	Priority
NFR-007-01	REST API documented with OpenAPI.	Must
NFR-007-02	Database migrations are versioned.	Should

Targets marked illustrative are examples and may be changed by the client.

JOB-007-SPEC - Acceptance criteria of JOB-007

Acceptance criteria of JOB-007 define when the client accepts delivery. Each criterion is observable and linked to a requirement of JOB-007.

Criterion ID	Linked requirement	Acceptance criterion (JOB-007)	Verification
AC-007-01	REQ-007-01	A client can post a job and receive proposals in a staging environment.	Test, demo or document review
AC-007-02	REQ-007-02	Role permissions are covered by automated tests.	Test, demo or document review
AC-007-03	REQ-007-03	Proposal table sorts and filters on the agreed fields.	Test, demo or document review
AC-007-04	REQ-007-04	Deployment runs from a pipeline.	Test, demo or document review

JOB-007-SPEC - Assumptions and dependencies of JOB-007

- Client provides design mock-ups in week 2.

JOB-007-SPEC - Change control for JOB-007

Changes to the requirements of JOB-007 follow the process in EST-006: written request, impact estimate on cost and schedule, client approval and updated baseline. A requirement marked Must cannot be removed without client approval.

JOB-007-SPEC - Summary of key findings

- JOB-007 acceptance criteria: 4 observable tests.
- JOB-007 requirements marked Must: 3.

JOB-007-SPEC - Keywords and alternative terminology

JOB-007 requirements; JOB-007 acceptance criteria; requirements specification; SRS; functional requirements; non-functional requirements; acceptance test; Spring Boot; Angular; PostgreSQL; REST API design

10. JOB-008-SPEC: JOB-008 Requirements Specification and Acceptance Criteria

Source document ID: JOB-008-SPEC | Data status: Synthetic (fictional client and job); snapshot of the job record - the relational database is authoritative for live values

Purpose and scope: the detailed requirements and acceptance criteria of JOB-008 (API performance and database tuning).

JOB-008-SPEC executive summary

JOB-008 has 4 functional requirements, 2 non-functional requirements and 4 acceptance criteria, linked by IDs of the form REQ-008-NN and AC-008-NN.

JOB-008-SPEC - Functional requirements of JOB-008

Requirement ID	Requirement (JOB-008)	Priority
REQ-008-01	Identify the 10 slowest queries using the query plan.	Must
REQ-008-02	Implement index or query changes with migrations.	Must
REQ-008-03	Add caching where appropriate.	Must
REQ-008-04	Provide before and after measurements.	Should

JOB-008-SPEC - Non-functional requirements of JOB-008

Requirement ID	Requirement (JOB-008)	Priority
NFR-008-01	No downtime during migrations.	Must
NFR-008-02	Changes covered by tests.	Should

Targets marked illustrative are examples and may be changed by the client.

JOB-008-SPEC - Acceptance criteria of JOB-008

Acceptance criteria of JOB-008 define when the client accepts delivery. Each criterion is observable and linked to a requirement of JOB-008.

Criterion ID	Linked requirement	Acceptance criterion (JOB-008)	Verification
AC-008-01	REQ-008-01	Order-list query time is reduced by at least 50 percent in the agreed test (client target).	Test, demo or document review
AC-008-02	REQ-008-02	Migrations run on a copy of production data without errors.	Test, demo or document review
AC-008-03	REQ-008-03	Before and after report is delivered.	Test, demo or document review
AC-008-04	REQ-008-04	Regression tests pass.	Test, demo or document review

JOB-008-SPEC - Assumptions and dependencies of JOB-008

- Client provides a sanitized database copy in week 1.
- The sale date is a hard deadline.

JOB-008-SPEC - Change control for JOB-008

Changes to the requirements of JOB-008 follow the process in EST-006: written request, impact estimate on cost and schedule, client approval and updated baseline. A requirement marked Must cannot be removed without client approval.

JOB-008-SPEC - Summary of key findings

- JOB-008 acceptance criteria: 4 observable tests.
- JOB-008 requirements marked Must: 3.

JOB-008-SPEC - Keywords and alternative terminology

JOB-008 requirements; JOB-008 acceptance criteria; requirements specification; SRS; functional requirements; non-functional requirements; acceptance test; Spring Boot; PostgreSQL

11. JOB-009-SPEC: JOB-009 Requirements Specification and Acceptance Criteria

Source document ID: JOB-009-SPEC | Data status: Synthetic (fictional client and job); snapshot of the job record - the relational database is authoritative for live values

Purpose and scope: the detailed requirements and acceptance criteria of JOB-009 (E-commerce storefront refresh).

JOB-009-SPEC executive summary

JOB-009 has 4 functional requirements, 2 non-functional requirements and 4 acceptance criteria, linked by IDs of the form REQ-009-NN and AC-009-NN.

JOB-009-SPEC - Functional requirements of JOB-009

Requirement ID	Requirement (JOB-009)	Priority
REQ-009-01	Rebuild listing, detail and cart pages in Angular.	Must
REQ-009-02	Pages meet agreed accessibility checks (labels, focus order, contrast).	Must
REQ-009-03	Components have unit tests.	Must
REQ-009-04	Layout is responsive.	Should

JOB-009-SPEC - Non-functional requirements of JOB-009

Requirement ID	Requirement (JOB-009)	Priority
NFR-009-01	Lighthouse accessibility score of at least 90 (client target).	Must
NFR-009-02	Strict TypeScript.	Should

Targets marked illustrative are examples and may be changed by the client.

JOB-009-SPEC - Acceptance criteria of JOB-009

Acceptance criteria of JOB-009 define when the client accepts delivery. Each criterion is observable and linked to a requirement of JOB-009.

Criterion ID	Linked requirement	Acceptance criterion (JOB-009)	Verification
AC-009-01	REQ-009-01	Lighthouse accessibility audit meets the target on 4 key pages.	Test, demo or document review
AC-009-02	REQ-009-02	Keyboard-only purchase flow succeeds.	Test, demo or document review
AC-009-03	REQ-009-03	Unit tests exist for cart logic.	Test, demo or document review
AC-009-04	REQ-009-04	Responsive layout verified on 3 screen sizes.	Test, demo or document review

JOB-009-SPEC - Assumptions and dependencies of JOB-009

- Client provides design guidelines and the existing API.

JOB-009-SPEC - Change control for JOB-009

Changes to the requirements of JOB-009 follow the process in EST-006: written request, impact estimate on cost and schedule, client approval and updated baseline. A requirement marked Must cannot be removed without client approval.

JOB-009-SPEC - Summary of key findings

- JOB-009 acceptance criteria: 4 observable tests.
- JOB-009 requirements marked Must: 3.

JOB-009-SPEC - Keywords and alternative terminology

JOB-009 requirements; JOB-009 acceptance criteria; requirements specification; SRS; functional requirements; non-functional requirements; acceptance test; Angular; TypeScript; Unit testing; Accessibility

12. JOB-010-SPEC: JOB-010 Requirements Specification and Acceptance Criteria

Source document ID: JOB-010-SPEC | Data status: Synthetic (fictional client and job); snapshot of the job record - the relational database is authoritative for live values

Purpose and scope: the detailed requirements and acceptance criteria of JOB-010 (CI/CD pipeline and container hardening).

JOB-010-SPEC executive summary

JOB-010 has 4 functional requirements, 2 non-functional requirements and 4 acceptance criteria, linked by IDs of the form REQ-010-NN and AC-010-NN.

JOB-010-SPEC - Functional requirements of JOB-010

Requirement ID	Requirement (JOB-010)	Priority
REQ-010-01	Pipeline builds, tests and deploys both services.	Must
REQ-010-02	Images run as non-root and are scanned.	Must
REQ-010-03	Secrets come from a secret store.	Must
REQ-010-04	A short runbook is delivered.	Should

JOB-010-SPEC - Non-functional requirements of JOB-010

Requirement ID	Requirement (JOB-010)	Priority
NFR-010-01	Pipeline completes in under 15 minutes (illustrative target).	Must
NFR-010-02	Build is reproducible.	Should

Targets marked illustrative are examples and may be changed by the client.

JOB-010-SPEC - Acceptance criteria of JOB-010

Acceptance criteria of JOB-010 define when the client accepts delivery. Each criterion is observable and linked to a requirement of JOB-010.

Criterion ID	Linked requirement	Acceptance criterion (JOB-010)	Verification
AC-010-01	REQ-010-01	A commit to main triggers build, test and deploy to staging.	Test, demo or document review
AC-010-02	REQ-010-02	Image scan report shows no critical findings or documented exceptions.	Test, demo or document review
AC-010-03	REQ-010-03	Containers run as non-root.	Test, demo or document review

Criterion ID	Linked requirement	Acceptance criterion (JOB-010)	Verification
AC-010-04	REQ-010-04	Runbook is reviewed by the client.	Test, demo or document review

JOB-010-SPEC - Assumptions and dependencies of JOB-010

- Client provides repository and staging access.

JOB-010-SPEC - Change control for JOB-010

Changes to the requirements of JOB-010 follow the process in EST-006: written request, impact estimate on cost and schedule, client approval and updated baseline. A requirement marked Must cannot be removed without client approval.

JOB-010-SPEC - Summary of key findings

- JOB-010 acceptance criteria: 4 observable tests.
- JOB-010 requirements marked Must: 3.

JOB-010-SPEC - Keywords and alternative terminology

JOB-010 requirements; JOB-010 acceptance criteria; requirements specification; SRS; functional requirements; non-functional requirements; acceptance test; Docker; CI/CD

13. Summary of key findings

- JOB-001-SPEC: JOB-001 acceptance criteria: 4 observable tests.
- JOB-002-SPEC: JOB-002 acceptance criteria: 4 observable tests.
- JOB-003-SPEC: JOB-003 acceptance criteria: 4 observable tests.
- JOB-004-SPEC: JOB-004 acceptance criteria: 4 observable tests.
- JOB-005-SPEC: JOB-005 acceptance criteria: 4 observable tests.
- JOB-006-SPEC: JOB-006 acceptance criteria: 4 observable tests.
- JOB-007-SPEC: JOB-007 acceptance criteria: 4 observable tests.
- JOB-008-SPEC: JOB-008 acceptance criteria: 4 observable tests.
- JOB-009-SPEC: JOB-009 acceptance criteria: 4 observable tests.
- JOB-010-SPEC: JOB-010 acceptance criteria: 4 observable tests.

14. Keywords and alternative terminology

JOB-001 requirements; JOB-001 acceptance criteria; requirements specification; SRS; functional requirements; non-functional requirements; acceptance test; Angular; Spring Boot; PostgreSQL; JOB-002 requirements; JOB-002 acceptance criteria; TypeScript; RxJS; JOB-003 requirements; JOB-003 acceptance criteria; Python; RAG pipeline; Vector search; FastAPI; JOB-004 requirements; JOB-004 acceptance criteria; Docker; Kubernetes; CI/CD; Terraform; JOB-005 requirements; JOB-005 acceptance criteria; Flutter; Dart; JOB-006 requirements; JOB-006 acceptance criteria; scikit-learn; JOB-007 requirements; JOB-007 acceptance criteria; REST API design; JOB-008 requirements; JOB-008 acceptance criteria; JOB-009 requirements; JOB-009 acceptance criteria; Unit testing; Accessibility; JOB-010 requirements; JOB-010 acceptance criteria
