Purpose and scope: provide complete, step-by-step score calculations for six fictional proposals covering every status and the custom-weight case.

2. Executive summary

Six proposals are evaluated step by step with skill, budget, deadline, experience, review and overall calculations, showing how flags and statuses arise.

3. How to read these worked evaluations

Each example recomputes one fictional proposal from the stored inputs with the deterministic rules of EVA-001 to EVA-005. The values match expected_scores.csv. They are snapshots for explanation and testing; the database holds live values. Selected cases: PRP-001 (eligible with flags), PRP-002 (mandatory skill missing), PRP-005 (custom weights), PRP-006 (hard deadline exceeded), PRP-009 (late soft deadline and capacity gap), PRP-017 (low price and fast delivery).
