14. Checks an evaluator applies to a technical approach

- Every mandatory requirement has a stated approach.
- Technologies match the job's mandatory skills.
- Testing and deployment are included or an add-on is priced.
- Claims are checked against the portfolio (PORT-001); unsupported claims are labelled.
- Proposals that describe a different architecture than requested explain why.

15. Summary of key findings

- Approach coverage is compared with evidence in the portfolio.
- Unsupported claims are labelled.
- Different architectures need an explanation.
