EK-05 Scoring Rubric Reference Card

Document ID: EK-05 | Category C: Evaluation knowledge base

1. Document metadata

Field	Value
Document ID	EK-05
Filename	EK-05_Scoring_Rubric_Reference_Card.pdf
Category	C - Evaluation knowledge base
Version	1.0
Creation date	2026-10-14
Data status	Factual methodology parameters taken from the scoring engine
Main topics	Scoring rubric; Parameters; Statuses; Thresholds
Relevant skills and technologies	Scoring
Relevant entity IDs	EVA-001, EVA-002, EVA-003, EVA-004, EVA-005, QUA-004

Purpose and scope: one-page reference of every scoring parameter used by the deterministic engine.

2. Executive summary

Weights, evidence credits, budget and deadline formulas, caps, thresholds, experience factors, review shrinkage, statuses and confidence labels in one place.

3. Default criterion weights

Criterion	Weight
Technical skill match	30%
Budget compatibility	25%
Deadline compatibility	20%
Relevant experience	15%
Reviews and reputation	10%

Overall = sum(weight x score) over scored criteria divided by the sum of their weights. All scores are 0 to 100.

4. Skill evidence credits (EVA-001)

Evidence type	Credit
direct	1.00
direct-lower-level	0.60
indirect	0.50
unsupported-claim	0.25
missing	0.00

Required skill weight 2, optional weight 1. Mandatory level L3; other level L2. A mandatory skill with credit below 0.60 gives status HOLD_PENDING_EVIDENCE.

5. Budget rules (EVA-002)

Condition	Score
Adjusted price <= preferred maximum	100 (cap 80 and flag if below 60% of preferred)
Between preferred and hard limit	100 - 50 x (P - pref) / (hard - pref)
Above hard limit	0 and ineligible

Flag: upfront payment above 50 percent.

6. Deadline rules (EVA-003)

Condition	Result
T <= D	100
Soft, D < T <= 1.25 D	100 - 50 x (T - D) / (0.25 D)
Soft, T > 1.25 D	0 and flag
Hard, T > D	0 and ineligible
T < 0.6 x reference	cap 70 and flag
Capacity < 80% of effort	cap 60 and flag

7. Experience rules (EVA-004)

Project relevance r = (0.40 tech + 0.25 domain + 0.20 responsibility + 0.15 complexity) x recency x outcome. Role weights: lead 1.0, contributor 0.7, minor 0.4. Outcome weights: success 1.0, partial 0.85. Score = 100 x (0.60 r1 + 0.25 r2 + 0.15 r3). Recency: 1.0 within 1 year, 0.95 within 2, 0.85 within 3, 0.7 older.

8. Reviews rule (QUA-004)

Base = (mean rating - 1) / 4 x 100. Score = (n x base + 3 x 60) / (n + 3). No reviews: criterion not scored; weights renormalized.

9. Statuses

Status	Meaning
ELIGIBLE	No hard-constraint breach and no flags
ELIGIBLE_WITH_FLAGS	Eligible with one or more flags
HOLD_PENDING_EVIDENCE	Mandatory skill lacks direct evidence
INELIGIBLE_HARD_CONSTRAINT	Hard budget or hard deadline exceeded

10. Confidence

High: all criteria scored and no flags. Medium: one criterion missing or flags present. Low: two or more criteria missing. Confidence describes data completeness.

11. Parameter change policy

Parameters are illustrative defaults. Any change must be versioned, and expected_scores.csv must be regenerated by the scoring engine before retrieval tests are compared.

12. Summary of key findings

- Parameters come from the scoring engine code.
- Changes must be versioned.

- Statuses are independent of weighted score.

13. Keywords and alternative terminology

scoring rubric; parameter reference; thresholds; caps; credit table; formulas; cheat sheet
