EK-08 Skill Taxonomy, Synonyms and Related Skills

Document ID: EK-08 | Category C: Evaluation knowledge base

1. Document metadata

Field	Value
Document ID	EK-08
Filename	EK-08_Skill_Taxonomy_and_Synonyms.pdf
Category	C - Evaluation knowledge base
Version	1.0
Creation date	2026-10-14
Data status	Synthetic taxonomy computed from the fictional dataset
Main topics	Skill taxonomy; Synonyms; Related skills
Relevant skills and technologies	AWS; Accessibility; Angular; Apache Kafka; CI/CD; Dart; Docker; FastAPI; Firebase push; Flutter; Integration testing; Kubernetes; LLM evaluation; Monitoring; Native mobile; NgRx; Offline storage; PostgreSQL; PyTorch; Python
Relevant entity IDs	EVA-001, PORT-001, FRE-001, FRE-002, FRE-003, FRE-004, FRE-005, FRE-006

Purpose and scope: list canonical skills with aliases, related skills and which fictional freelancers have verified or claimed each skill.

2. Executive summary

The taxonomy covers 32 canonical skills in eight categories, with aliases for matching and related skills for indirect evidence.

3. Why a skill taxonomy is needed

Jobs, proposals and profiles use different spellings. The taxonomy maps every name to one canonical skill so matching is consistent (EVA-001). Related skills give indirect evidence only.

4. Canonical skills, aliases and related skills

Canonical skill	Category	Aliases treated as identical	Related skills (indirect evidence)	Verified in	Claimed by
AWS	DevOps	-	-	FRE-005	-
Accessibility	Frontend	-	-	FRE-002	-
Angular	Frontend	Angular 2+; Angular framework; Angular CLI	-	FRE-001, FRE-002	-
Apache Kafka	Backend	-	-	-	FRE-003
CI/CD	DevOps	continuous integration; continuous delivery; GitHub Actions; pipelines	-	FRE-005	FRE-001
Dart	Mobile	Dart language	Flutter	FRE-006	-
Docker	DevOps	containers; containerization	-	FRE-001, FRE-003, FRE-004, FRE-005	-
FastAPI	AI/ML	-	Python	FRE-004	-
Firebase push	Mobile	-	-	FRE-006	-
Flutter	Mobile	Flutter SDK; cross-platform mobile	-	FRE-006	-
Integration testing	Quality	Testcontainers; API tests	Unit testing	FRE-003	FRE-002
Kubernetes	DevOps	K8s; container orchestration	Docker	FRE-005	FRE-001
LLM evaluation	AI/ML	-	-	FRE-004	-
Monitoring	DevOps	observability; Prometheus; Grafana	-	FRE-005	FRE-004
Native mobile	Mobile	-	-	-	FRE-006
NgRx	Frontend	-	RxJS	FRE-002	-
Offline storage	Mobile	-	-	FRE-006	-
PostgreSQL	Data	Postgres; relational database; PSQL	-	FRE-001, FRE-003	-
PyTorch	AI/ML	-	scikit-learn	FRE-004	-
Python	AI/ML	Python 3	-	FRE-004	-
RAG pipeline	AI/ML	retrieval-augmented generation; RAG	Vector search	FRE-004	-
REST API design	Backend	RESTful API; HTTP API; OpenAPI	Spring Boot; FastAPI	FRE-001, FRE-003	-
Redis	Data	in-memory cache	-	FRE-003	-
RxJS	Frontend	-	Angular	FRE-002	-
Security scanning	DevOps	-	-	-	FRE-005
Spring Boot	Backend	Spring; Spring Framework 6; Java backend	Spring Security	FRE-001, FRE-003	-
Spring Security	Backend	-	-	FRE-003	-
Terraform	DevOps	infrastructure as code; IaC	AWS	FRE-005	-
TypeScript	Frontend	TS	Angular	FRE-001, FRE-002	-

Canonical skill	Category	Aliases treated as identical	Related skills (indirect evidence)	Verified in	Claimed by
Unit testing	Quality	JUnit; Jasmine; Karma; widget tests	Integration testing	FRE-001, FRE-002, FRE-003, FRE-006	-
Vector search	AI/ML	ChromaDB; embeddings search; semantic search	RAG pipeline	FRE-004	-
scikit-learn	AI/ML	sklearn; classical machine learning	PyTorch	FRE-004	-

5. Level scale

Level	Meaning
L1 Familiar	Tutorial or small task use; needs guidance
L2 Working	Completes defined tasks independently
L3 Proficient	Designs and delivers features with tests
L4 Advanced	Makes architecture decisions and resolves hard defects

Levels come from evidence, not years of experience. Mandatory skills require L3 or above for full credit.

6. Rules for adding a skill

- Use the official technology name as the canonical name.
- Add aliases only when the two names refer to the same technology.
- Add a related-skill link only when experience in one genuinely transfers to the other.
- Do not map different versions of a framework to different skills unless the job requires it.

7. Summary of key findings

- Canonical names make matching reproducible.
- Related skills give indirect evidence only.
- Levels come from evidence.

8. Keywords and alternative terminology

skill taxonomy; synonyms; aliases; canonical skill; related skills; technology mapping; AWS; Accessibility; Angular; Apache Kafka; CI/CD; Dart; Docker; FastAPI; Firebase push; Flutter; Integration testing; Kubernetes; LLM evaluation; Monitoring; Native mobile; NgRx; Offline storage; PostgreSQL; PyTorch; Python; RAG pipeline; REST API design; Redis; RxJS; Security scanning; Spring Boot; Spring Security; Terraform; TypeScript; Unit testing; Vector search; scikit-learn
